5

CLAIMS

- 1) The use of geraniol for preparing a therapeutic composition for blocking the development and differentiation of tumor cells.
- 2) The use of claim 1, wherein geraniol is used for preparing a therapeutic composition potentiating the cytotoxic effect of an antitumoral agent.
- 3) The use of any of claims 1 or 2, wherein said tumor cells are selected among colorectal tumor cells, hepatoma cells, digestive or aerodigestive cancer cells, prostate cancer cells.
- 4) The use of claim 2, wherein said antitumoral agent is selected from 5-fluorouracil, oral derivatives of fluorouracil, irinotecan (CPT-11), platinium diammonocyclohexan (oxaliplatinium), and taxol.
 - 5) A composition comprising a cytotoxic antitumoral agent and geraniol.
- 6) The composition of claim 5, wherein said antitumoral agent is selected from 5-fluorouracil, oral derivatives of fluorouracil, irinotecan (CPT-11), platinium diammonocyclohexan (oxaliplatinium), and taxol.
